Description

Tech Mahindra Recruitment 2024

Are you passionate about building robust data pipelines and transforming raw data into actionable insights? Do you thrive in a collaborative environment where your technical expertise can directly impact business decisions? If so, then a career as a Data Engineer at Tech Mahindra might be the perfect fit for you!

Tech Mahindra Jobs Near Me

We are searching for talented and motivated Data Engineers to join our team and play a key role in our mission to leverage the power of data for our clients. In this role, you'll be responsible for designing, developing, and maintaining data pipelines that deliver high-quality data to our data scientists and analysts.

Summary

As a Data Engineer at Tech Mahindra, you'll be a critical member of our data engineering team, working alongside data scientists, analysts, and software engineers to design, develop, and maintain scalable data pipelines. You'll leverage your expertise in data engineering tools and technologies to extract, transform, and load (ETL) data from various sources, ensuring its accuracy, consistency, and availability for downstream applications.

Your responsibilities will also include collaborating with stakeholders to understand

data requirements, designing data models, and implementing data quality checks. You'll have the opportunity to work on cutting-edge projects, solve complex data challenges, and contribute to the continuous improvement of our data infrastructure.

(adsbygoogle = window.adsbygoogle || []).push({});

Key Responsibilities

- Design, develop, and maintain data pipelines using industry-standard tools and technologies (e.g., Apache Spark, Hadoop, Kafka, AWS, Azure)
- Extract, transform, and load (ETL) data from various sources (databases, APIs, flat files)
- Develop and implement data quality checks and data cleansing routines
- Design and implement data models to optimize data storage and retrieval
- Collaborate with data scientists, analysts, and business stakeholders to understand data requirements
- Monitor and troubleshoot data pipelines to ensure smooth operation and data integrity
- Automate data processing tasks using scripting languages (e.g., Python, Shell)
- Stay up-to-date with the latest trends and technologies in data engineering
- Document data pipelines and processes for maintainability

Required Skills and Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience)
- Minimum 1-3 years of experience in data engineering or a related role (experience can be adjusted based on company needs)
- Strong understanding of data engineering concepts (ETL, data warehousing, data governance)
- Proficiency in programming languages like Python, Java, or Scala
- Experience with big data technologies (e.g., Apache Spark, Hadoop) is a plus
- Experience with cloud platforms (e.g., AWS, Azure, GCP) is a plus
- Excellent problem-solving and analytical skills
- Strong communication and collaboration skills
- Ability to work independently and as part of a team

Experience

This role is open to both experienced data engineers and passionate recent graduates. If you have a strong foundation in data engineering concepts and a willingness to learn, we encourage you to apply!

Why Join Tech Mahindra ?

Tech Mahindra offers a dynamic and collaborative work environment where you'll have the opportunity to work on challenging and impactful projects. You'll be surrounded by talented colleagues who are passionate about data and innovation. We provide comprehensive training and development opportunities to help you grow your skills and advance your career.

Here are some of the additional benefits of joining Tech Mahindra:

- Competitive salary and benefits package
- Opportunity to work on cutting-edge technologies
- Collaborative and supportive work environment
- Global exposure and opportunities to work on international projects
- Emphasis on work-life balance and employee well-being

Application Process

To apply for this position, please submit your resume and cover letter online. In your cover letter, please tell us about your experience with data engineering and why you're interested in joining Tech Mahindra.

Motivate to Join

We are looking for data engineers who are passionate about building innovative data solutions and who are eager to make a real impact. If you're a highly motivated individual with a strong work ethic and a desire to learn, we encourage you to apply!

Join Us and Help Us Transform the Future with Data!

Tech Mahindra is a leading provider of digital transformation solutions and services. We are at the forefront of innovation, and we're looking for talented individuals to join our team and help us shape the future of data. If you're ready to take your career to the next level and make a difference, we encourage you to apply!
